Personal Profile

I am a dedicated and enthusiastic professional with nearly 20 years' experience within the construction industry with a strong civils background. I have spent my last 10 years within a supervisory and management role.

I am 100% committed to ensuring that all projects are completed on time and to the highest standard whilst ensuring full compliance with industry regulations relating to health and safety, environment and quality. I am able to work effectively using my own initiative and able to prioritise my workload to achieve challenging deadlines. I possess excellent interpersonal skills enabling me to communicate effectively with stakeholders, clients, colleagues and subcontractors. I enjoy being part of a successful and productive team and thrive in highly pressurised and challenging working environments. I am commercially focused throughout the planning and production stages of all of my projects.

Referee: Tim Read – Construction Manager

Contact: 077990 774 973

January 2002 – August 2004 – Andy Jack Building Services.

I first started working for AJBS, part time, whilst at school and then again during college. This was where my career prospects took a turn as I enjoyed working with my hands, within a practical role and loved working outdoors.
I worked with a sole trader as a two-man band renovating properties, building extensions, hard and soft land scaping and all aspects of domestic building works.
Whilst working here I learned a lot of the building fundamentals and was able to take the practical knowledge away with me to start my working life within the construction industry.
